

COMMERCIAL WATER REUSE SYSTEMS

Since 2012, Greyster has been providing water harvesting and reuse systems for Commercial, Industrial, Educational and Residential buildings throughout North America.

Incoming Water Options: Stormwater | Rainwater | Graywater

Treatment Options: Monitoring | Filtration | Disinfection | Diversion | Distribution

Use Applications: Irrigation | Cooling Towers | Toilets | Trap Seal Priming | Infiltration Beds | Equipment Washing | Car Washing

GREYTER SERVICES

- Engineering Specification
- System Design & System Production
- Installation Support
- Commissioning
- Training
- Service & Maintenance

TAILORED SOLUTIONS

Greyster provides water treatment solutions utilizing customized designs tailored to each customer's unique site requirements.

Greyster determines water treatment intensity by assessing a site's incoming water (quality, volume) and desired reuse applications. Systems are created by incorporating optional standardized modular subsystems to meet the site's needs.
